

In IBS Precision Engineering you will recognise a leading innovator in high-grade precision engineering, constantly challenged to push back frontiers. From our offices in Europe and agents around the world, we serve the world market with both standard and customised metrology solutions and engineering services that excel in accuracy and efficiency. For our customers this will ultimately result in a better product quality, an increased productivity and reduced costs.

IBS Precision Engineering is involved in special measuring machines, non-contact measuring systems, machine tool calibration & inspection systems and air bearings.

We currently have an open position for:

Mechanical Designer

Job focus

- design of ultra precision metrology machines and systems
- responsible for the entire process from specification to actual machine
- collaborating in a team of five mechanical design engineers
- being able to work independently and be a good team player as well
- be a direct contact for both customers and suppliers

Your profile

- a relevant study on academic level
- thorough knowledge of precision design principles
- experience in working with 3D CAD systems
- good communicative skills
- fluent in English; knowledge of German and / or French is a plus
- pro-active attitude
- broad technical knowledge considering the diversity of projects

Interested in joining our enthusiastic team of highly qualified professionals? Please send your application and CV to dr. H.A.M. Spaan. E-mail: spaan@ibspe.com.
